CONTENTS

Volume 33, Issue Nos 1–15 (2004)

EARTHQUAKE ENGINEERING AND STRUCTURAL DYNAMICS

Issue No. 1, JANUARY

An experimental study on seismic responses of multifunctional vibration-absorption reinforced concrete megaframe structures: Z. Lan, Y. Tian, L. Fang, S. Liang and X. Wang 1

Dynamic performance of twin curved cable-stayed bridges: C. Gentile and F. Martinez y Cabrera 15

Comparison of displacement coefficient method and capacity spectrum method with experimental results of RC columns: Y.-Y. Lin, K.-C. Chang and Y.-L. Wang 35

Seismic energy dissipation in deteriorating systems through low-cycle fatigue: A. Erberik and H. Sucuoğlu 49

Energy-based hysteresis and damage models for deteriorating systems: H. Sucuoğlu and A. Erberik 69

A viscous boundary for transient analyses of saturated porous media: Z. Zerfa and B. Loret 89

Non-iterative time integration scheme for non-linear dynamic FEM analysis: R. Honda, H. Sakai and S. Sawada 111

Identification of base-excited structures using output-only parameter estimation: B. A. Pridham and J. C. Wilson 133

Issue No. 2, FEBRUARY

Wavelet-based non-stationary seismic rocking response of flexibly supported tanks: P. Chatterjee and B. Basu 157

An attenuation model for distant earthquakes: A. Chandler and N. Lam 183

Seismic microzonation of the greater Bangkok area using microtremor observations: R. Tuladhar, F. Yamazaki, P. Warnitchai and J. Saita 211

The effect of an interface boundary layer on the resonance properties of a buried structure: Y. S. Karinski, V. V. Shershnev and D. Z. Yankelevsky 227

Indexed or abstracted by American Geological Institute; Applied Mechanics Reviews; Applied Science & Technology Abstracts (H. W. Wilson); Cambridge Scientific Abstracts; Current Contents®/Engineering, Computing & Technology (ISI); Earthquake Engineering Abstracts (NISEE); Ei COMPENDEX PLUS; Ei Page One; Environment Abstracts (CIS); Fluidex (Elsevier); GeoArchive (Geosystems); Geobase (Elsevier); Geological Abstracts (Elsevier); GeoRef; GeoSEARCH (Geosystems); Geotechnical Abstracts (Geotext Services); Geotitles: Geoarchaeology (Geosystems); Groundwater & Soil Contamination Database; Indian Society of Earthquake Technology Bulletin; International Bibliographies of Periodical Literature (IBR & IBZ); International Civil Engineering Abstracts (Anbar); International Petroleum Abstracts; ISI Alerting Services; Mechanics; Science Citation Index Expanded (also known as SciSearch®) (ISI); Science Citation Index® (ISI); Shock & Vibration Digest (Sage).

Non-linear seismic response of the rail-counterweight system in elevators in buildings: M. P. Singh, Rildova and L. E. Suarez 249

Response to orthogonal components of ground motion and assessment of percentage combination rules: E. Heredia-Zavoni and R. Machicao-Barrionuevo 271

A discontinuous Galerkin method for seismic soil–structure interaction analysis in the time domain: S. -H. Park and N. Antin 285

Issue No. 3, MARCH

Period formulas of shear wall buildings with flexible bases: F. Ghrib and H. Mamedov 295

Non-parametric–parametric model for random uncertainties in non-linear structural dynamics: application to earthquake engineering: C. Desceliers, C. Soize and S. Cambier 315

Earthquake behavior of structures with copper energy dissipators: J. C. De la Llera, C. Esguerra and J. L. Almazán 329

Estimating the seismic displacement of friction pendulum isolators based on non-linear response history analysis: K. L. Ryan and A. K. Chopra 359

Seismic response of a cable-stayed bridge deck under multi-component non-stationary random ground motion: S. M. Allam and T. K. Datta 375

Estimation of seismic demands on isolators in asymmetric buildings using non-linear analysis: K. L. Ryan and A. K. Chopra 395

Issue No. 4, 10 APRIL

On-line identification and damage detection in non-linear structural systems using a variable forgetting factor approach: J.-W. Lin and R. Betti 419

Strain field measurements of rubber by image analysis and design criteria for laminated rubber bearings (LRB): C. S. Lewangamage, M. Abe, Y. Fujino and J. Yoshida. 445

Optimal design of added viscoelastic dampers and supporting braces: J.-H. Park, J. Kim and K.-W. Min 465

Non-linear analysis of a collapsed reinforced concrete chimney: W. Huang, P. L. Gould, R. Martinez and G. S. Johnson 485

Cumulative damage-based inelastic cyclic demand spectrum: S. K. Kunnath and Y. H. Chai 499

Optimal design of viscoelastic dampers using eigenvalue assignment: S.-H. Lee, D.-I. Son, J. Kim and K.-W. Min 521

Issue No. 5, 25 APRIL

Analysis, testing, and implementation of seismic isolation of buildings in Chile: J. C. De la Llera, C. Lüders, P. Leigh and H. Sady 543

Frequency domain modal analysis of earthquake input energy to highly damped passive control structures: I. Takewaki 575

Evaluation of pounding countermeasures and serviceability of elevated bridges during seismic excitation using 3D modeling: P. Zhu, M. Abe and Y. Fujino 591

Correlating measured and simulated dynamic responses of a tall building to long-distance earthquakes: T.-C. Pan, J. M. W. Brownjohn and X.-T. You 611

Seismic performance of laminated timber frames with fiber-reinforced joints: B. Kasal, S. Pospisil, I. Jirovsky, A. Heiduschke, M. Drdacky and P. Haller 633

Predictive control of seismic structures with semi-active friction dampers: L.-Y. Lu 647

Issue No. 6, MAY

Evaluation of the seismic performance of a three-story ordinary moment-resisting concrete frame: S. W. Han, O.-S. Kwon and L.-H. Lee 669

Behavior of moment-resisting frame structures subjected to near-fault ground motions: B. Alavi and H. Krawinkler 687

Strengthening of moment-resisting frame structures against near-fault ground motion effects: B. Alavi and H. Krawinkler 707

Semi-active fuzzy control for seismic response reduction using magnetorheological dampers: K.-M. Choi, S.-W. Cho, H.-J. Jung and I.-W. Lee 723

Seismic structural control using an electric servomotor active mass driver system: C.-L. Lee and Y.-P. Wang 737

Damage evaluation models of reinforced concrete buildings based on the damage statistics and simulated strong motions during the 1995 Hyogo-ken Nanbu earthquake: K. Nagato and H. Kawase 755

Fundamental study on the response characteristics of drivers during an earthquake based on driving simulator experiments: Y. Maruyama and F. Yamazaki 775

ERRATUM 793

Issue No. 7, JUNE

Hybrid seismic protection of cable-stayed bridges: H.-J. Jung, K.-S. Park, B. F. Spencer Jr and I.-W. Lee 795

Development and modeling of a frictional wall damper and its applications in reinforced concrete frame structures: C.-G. Cho and M. Kwon 821

Impulsive Dirac-delta forces in the rocking motion: F. Prieto, P. B. Lourenço and C. S. Oliveira 839

Life-cycle cost analysis based on a renewal model of earthquake occurrences: Y. Takahashi, A. Der Kiureghian and A. H-S. Ang 859

The seismic shear of ductile cantilever wall systems in multistorey structures: A. Rutenberg 881

Issue No. 8, 10 JULY

Equivalent viscous damping for modeling inelastic impacts in earthquake pounding problems: S. A. Anagnostopoulos 897

A modal pushover analysis procedure to estimate seismic demands for unsymmetric-plan buildings: A. K. Chopra and R. K. Goel 903

Elastic and inelastic drift performance optimization for reinforced concrete buildings under earthquake loads: C.-M. Chan and X.-K. Zou 929

Comparing the adequacy of alternative ground motion intensity measures for the estimation of structural responses: P. Giovenale, C. A. Cornell and L. Esteva 951

Issue No. 9, 25 JULY

An envelope for Mohr's circle in seismically excited three-dimensional structures: C. Menun 981

Approximate modal decompositon of inelastic dynamic responses of wall buildings: C. Sangarayakul and P. Warnitchai 999

Near-fault ground motions, and the response of elastic and inelastic single-degree-of-freedom (SDOF) systems: G. P. Mavroeidis, G. Dong and A. S. Papageorgiou 1023

SHORT COMMUNICATIONS

Nested lumped-parameter models for foundation vibrations: W.-H. Wu and W.-H. Lee 1051

A mathematical basis for the convergence of the capacity spectrum method: Y.-Y. Lin, T.-F. Chuang and K.-C. Chang 1059

Issue No. 10, AUGUST

Generalized-α methods for seismic structural testing: A. Bonelli and O. S. Bursi 1067

Three-dimensional models of reservoir sediment and effects on seismic response of arch dams: O. Maeso, J. J. Aznárez and J. Domínguez 1103

Issue No. 11, SEPTEMBER

Pseudo-dynamic testing of bridges using non-linear substructuring: A. V. Pinto, P. Pegon, G. Magonette and G. Tsionis 1125

Improved design of sliding mode control for civil structures with saturation problem: S.-H. Lee, K.-W. Min, Y.-C. Lee and L. Chung 1147

Semi-empirical model for site effects on acceleration time histories at soft-soil sites. Part 1: formulation and development: A. Bárcena and L. Esteva 1165

Issue No. 12, OCTOBER

New real-value modal combination rules for non-classically damped structures: G. Falsone and G. Muscolino 1187

Evaluation of site-dependent constant-damage design spectra for reinforced concrete structures: P. Panyakapo 1211

Casualty occurrence mechanism in the collapse of timber-frame houses during an earthquake: J. Kiyono and A. Furukawa 1233

Issue No. 13, 10 NOVEMBER

Simulation of the seismic performance of the Bolu Viaduct subjected to near-fault ground motions: S. W. Park, H. Ghasemi, J. Shen, P. G Somerville, W. P. Yen and M. Yashinsky 1249

Response of a double-wedge base-isolation device: J. E. Luco 1271

Semi-empirical model for site effects on acceleration time histories at soft-soil sites. Part 2: Calibration: A. Bárcena and L. Esteva 1287

Issue No. 14, 25 NOVEMBER

Correlation of dynamic characteristics of a super-tall building from full-scale measurements and numerical analysis with various finite element models: Q. S. Li and J. R. Wu 1311

Seismic performance evaluation of steel arch bridges against major earthquakes. Part 1: Dynamic analysis approach: T. Usami, Z. Lu, H. Ge and T. Kono 1337

Seismic performance evaluation of steel arch bridges against major earthquakes. Part 2: Simplified verification procedure: Z. Lu, T. Usami and H. Ge 1355

Issue No. 15, DECEMBER

Seismic tests on reinforced concrete and steel frames retrofitted with dissipative braces: F.J. Molina, S. Sorace, G. Terenzi, G. Magonette and B. Viaccoz 1373

Inelastic spectra for infilled reinforced concrete frames: M. Dolšek and P. Fajfar 1395

SHORT COMMUNICATIONS

Response of SDOF system to non-stationary earthquake excitation: R.S. Jangid 1417

ERRATUM 1429
